"SYNC-ENABLE" YOUR PRODUCTS BY BUILDING ON THE EXTENSIBLE INTELLISYNC PLATFORM

In a world where information is literally at your fingertips, why are you having trouble getting the information you need when you need it – on your terms? Pumatech's Intellisync® Software Development Kit (Intellisync SDK) empowers you to develop custom synchronization solutions, as you define them, because we understand that one solution does not fit all. Our synchronization technology drives the hottest applications in the enterprise today, on and off the Internet. Yahoo!, Oracle, Research in Motion (RIM), Siebel Systems, Clarify, and Alcatel are just a few of the growing list of companies using our technology.

Using the Intellisync SDK, you can create an out-of-the-box solution for your application, mobile device, or Web-based service. And since the Intellisync SDK also boasts interoperability with Connectors of over 180 Pumatech OEM customers, the possibilities are endless.

Intellisync SDK ensures your product will be capable of synchronizing many of the most popular PIM data types (calendar, contacts, e-mail, tasks, and more) and devices available, greatly enlarging your potential customer base while reducing development costs and time to market. Utilize the power of content-aware, intelligent synchronization with the Intellisync SDK.

KEY FEATURES

**INSTANT COMPATIBILITY
WITH THE
MARKET LEADER**

**PARTNERSHIPS WITH
LEADING ISVs,
PORTALS, AND DEVICE
MANUFACTURERS**

OPEN SYNC PLATFORM

**REDUCES
DEVELOPMENT COSTS
& TIME TO MARKET**

Customer benefits

- Quickly and easily create custom solutions using industry-standard Intellisync platform technology
- Shorten development cycles to get to market faster
- Develop once and support multiple handheld devices and PIM applications

Intellisync SDK

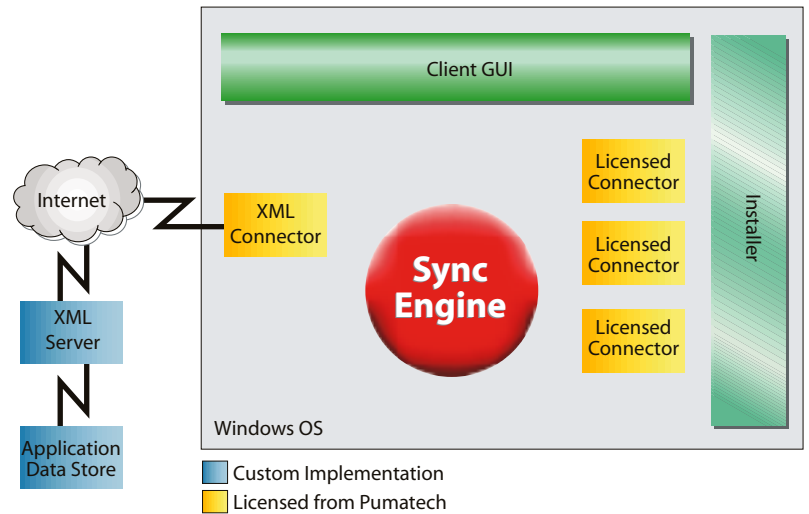

The Intellisync SDK is a toolkit used to develop a custom sync solution from scratch. Using the information provided in the SDK, your development team will create code for a custom Connector that connects your database, an Intellisync desktop client, and an installation procedure. Your team may also be required to create an API interface on your server. Whether you are looking to create a Web-based application or a desktop application, Intellisync SDK has a toolkit to expedite the creation of your solution.

Intellisync for Web toolkit

The Intellisync for Web toolkit is the ideal SDK add-on for Web-based PIM applications. It includes a pre-built Intellisync desktop client and XML connector that you can easily customize with your company's logos and branding. Your development team will create server-side XML that enables your server to communicate with your customized Intellisync desktop client.

Leverage Intellisync's feature set

Intellisync SDK toolkits offer your users the same features on which Intellisync users have relied to keep their data up-to-date easily and efficiently. These features include data mapping, powerful filtering capabilities, full conflict resolution, and many more.

Solution features

The Intellisync SDK provides a variety of additional support features:

- Project management
- Training program
- Consulting services
- Technical support
- Software testing
- Documented and working samples
- User documentation template
- Developer's Web site access
- Software maintenance

Minimum system requirements

- Windows 95 OSR2.1/98/2000//NT 4.0/Me/XP
- License for Intellisync SDK
- License to distribute run-time copies of Intellisync products
- 133Mhz Pentium-compatible PC; 150Mhz Pentium for Windows Me
- 64MB RAM; 24MB RAM for Windows 98; 32MB RAM for Windows Me
- 40MB available disk space
- For Palm handhelds: HotSync Manager 3.0; for Pocket PC/Windows CE devices: ActiveSync 3.1

Supported devices & applications

- Palm OS® or Pocket PC/Windows CE handheld
- Microsoft Outlook 97/98/2000/2002
- Microsoft Outlook Express* 4.01/5.0
- Microsoft Exchange Personal Address Book
- ACT! 4.02/2000
- GoldMine 3.2/4.0
- Lotus Notes 4.5/4.6/5.0
- Lotus Organizer 2.12/97/GS/Premium Edition 4.1/5.0/6.0
- GroupWise 5.2/5.5

*Microsoft Outlook Express 4.01/5.0 supports contacts only.
